Marketing Automation & CRM Operations Professional

Results-oriented marketing automation and CRM operations professional with experience managing multi-channel campaign execution, customer segmentation, lead nurturing, data quality, reporting, and cross-functional marketing and sales operations processes. Proven ability to build and optimize marketing automation programs, translate complex data into actionable insights, improve operational workflows, and support scalable campaign execution across multiple business units. Skilled in Salesforce Account Engagement/Pardot, Salesforce.com, HubSpot, Microsoft Dynamics CRM, Tableau, HTML email development, landing pages, forms, reporting, documentation, and stakeholder training. Known for strong attention to detail, clear communication, process improvement, and the ability to manage competing priorities, deadlines, and high-volume campaign work with accuracy and consistency.

Experience

LANDS' END, Marketing Automation Specialist, Dodgeville, WI (December 2024 to Current)

- Contributes to Lands' End's B2B and School Outfitters marketing efforts by building, managing, and optimizing digital marketing campaigns that support customer engagement, lead nurturing, promotional strategy, and sales enablement across multiple business units.
- Develops and executes complex Salesforce Account Engagement campaigns, including Engagement Studio programs, email sends, landing pages, forms, form handlers, completion actions, automation rules, dynamic lists, suppression logic, and campaign tracking.
- Collaborates with marketing, creative, sales, merchandising, and business unit stakeholders to translate campaign strategy into scalable marketing automation workflows that align with audience segmentation, promotional timing, customer lifecycle needs, and Salesforce campaign structure.
- Builds and maintains responsive HTML email and landing page templates, troubleshooting rendering issues, image paths, CTA styling, layout inconsistencies, form behavior, and brand compliance across Account Engagement assets.
- Manages segmented campaign execution for multi-track promotional programs, including business-unit specific messaging, audience targeting, campaign scheduling, proofing workflows, QA processes, and deployment readiness.
- Monitors campaign performance using Account Engagement, Salesforce, and B2B Marketing Analytics reporting, evaluating email engagement, landing page activity, form submissions, asset performance, and prospect behavior to inform campaign improvements.
- Supports data integrity and operational accuracy by maintaining clean list logic, reviewing prospect segmentation, validating Salesforce campaign connections, troubleshooting sync-related issues, and ensuring campaigns follow marketing operations best practices.
- Develops and documents repeatable processes, campaign build standards, QA checklists, and workflow guidelines to improve efficiency, reduce errors, and support consistent execution across high-volume marketing initiatives.
- Serves as a marketing automation subject matter expert and cross-functional partner, advising stakeholders on Account Engagement capabilities, campaign setup, reporting visibility, digital asset execution, and opportunities to improve automation strategy.

THE ALLIANCE, Sales Operations Market Information Specialist, Fitchburg, WI (July 2021 to September 2024)

- Contributed to The Alliance's mission as a cooperative advocate for self-funded employers seeking greater control over healthcare costs and improved access to affordable, high-quality care.
- Supported sales operations, member services, and business development initiatives by managing critical member data, operational workflows, stakeholder communications, and CRM-driven processes.
- Collaborated with Business Development and Member Services teams to manage member onboarding, changes, terminations, annual price adjustment communications, patronage distribution, and the Member Verification Project to maintain accurate organizational records.
- Led company-wide Microsoft Dynamics CRM training for sales, customer service, and executive leadership teams, improving user adoption, reporting visibility, and cross-functional understanding of CRM capabilities.
- Provided individualized CRM support by troubleshooting system issues, resolving data accuracy concerns, assisting users with reporting and dashboards, and identifying opportunities to improve CRM usability.
- Maintained and improved data integrity across member, prospect, and stakeholder records, supporting accurate reporting, reliable business insights, and more effective operational decision-making.
- Developed and documented standard operating procedures, process guidelines, workflows, and training materials to support

consistency across Business Development, Member Services, and other internal departments.

- Evaluated existing business processes and helped re-engineer workflows to improve efficiency, reduce manual effort, clarify ownership, and strengthen coordination between teams.
- Served as a primary contact for external stakeholders, including TPAs, agents, vendors, and employer groups, managing membership-related questions, updates, and operational needs with professionalism and accuracy.
- Supported reporting and market information efforts by organizing, validating, and interpreting business data to help internal teams better understand member activity, operational trends, and stakeholder needs.

LGC BIOSEARCH TECHNOLOGIES, Marketing Automation Specialist *Middleton, WI* (April 2020 to July 2021)

- Contributed to LGC Biosearch Technologies' marketing operations by managing email, telemarketing, and automation tactics designed to educate customers, support demand generation, and guide prospects through the customer journey toward purchase.
- Administered and maintained key marketing technology platforms, including Pardot, HubSpot, Salesforce.com, and Tableau, ensuring campaign execution, reporting, data quality, and system functionality supported global marketing initiatives.
- Collaborated with Sales, Marketing, and IT teams to troubleshoot platform issues, improve CRM and marketing automation functionality, support campaign execution, and enhance visibility into prospect and customer engagement.
- Managed audience segmentation and list qualification using email engagement, website activity, content downloads, page visits, and customer behavior to improve targeting, personalization, and lead progression.
- Measured campaign and nurture performance, analyzing engagement data and conversion activity to identify opportunities for optimization across the customer journey.
- Supported lead nurturing strategy by evaluating prospect behavior, refining automation logic, and improving campaign pathways to increase engagement and drive stronger sales readiness.
- Maintained data quality across Pardot, HubSpot, Salesforce.com, and Tableau by identifying inconsistencies, improving list hygiene, supporting clean customer records, and launching tactics to enhance data accuracy.
- Developed and documented best practices, QA processes, email testing procedures, and workflow standards to improve productivity, ensure campaign accuracy, and support global compliance requirements.
- Owned and managed the marketing communications and operational email calendar, balancing campaign priorities, internal stakeholder needs, audience impact, and deployment timing.

MADISON METROPOLITAN SCHOOL DISTRICT, Substitute Teacher *Madison, WI* (December 2019 to March 2020)
